## Fold Down Bunk w/Pads and Safety Net Option

Available all floor plans with standard slideout room for additional sleeping space. Available 935, 950 and 1150.

## FIVE-YEAR LIMITED WARRANTY

From start to finish, Alpenlite construction is precisely planned utilizing superior materials and innovative construction techniques not found in other campers. Thus, we confidently back every Alpenlite Truck Camper with a transferable, 5-year Limited Structural Warranty. Consult your authorized Alpenlite dealer or Western Recreational Vehicles, Inc., for all the warranty details and benefits of this reassuring industry-leading warranty coverage.

## WHAT MAKES AN ALPENLITE AN ALPENLITE?

### Complete welded aircraft quality 6005 T-5 aluminum tube body frame construction.

Stronger, lighter and more durable than wood framed parts, our aluminum tubing is 17% lighter than wood while maintaining superior mechanical qualities and tensile strength. Aluminum frame construction was pioneered by Alpenlite more than 26 years ago!

### Extra thick laminated and vacuum bonded crowned roof.

Highest strength to weight ratio in the industry offering higher "R" values and superior water shedding performance than competing designs. All Alpenlite structural components are vacuum bonded!

### Polystyrene block foam insulation in all structural components.

Provides 100% bond line for maximum strength and durability and greater "R" values than fiberglass.

### High-gloss gelcoat exterior surface

The smooth, automotive-inspired exterior offers higher reflectivity values, greater insulating capability and superior thermal transfer properties than other materials.

### Hidden details...

Like fully enclosed and insulated holding tanks, a fiberglass lower front wall for protection and weather tightness and a vinyl-sealed underbelly with solid metal corner mouldings and recessed screws.

## CONSTRUCTION

5 year Limited Structural Warranty
45 deg. MIG welded 6005 T-5 aircraft quality aluminum tube structure
Lampro® high-gloss gelcoated fiberglass exterior w/luan reinforcement
2lb. density polystyrene closed cell block foam insulation
